CD HOVERCRAFT

MATERIALS:

- 1 old CD
 - 1 balloon
 - Open valve top, like from a bottle of dish soap or a sports drink
 - Hot glue gun
- Optional: Card stock, markers, and glue stick

INSTRUCTIONS:

- 1.If decorating with card stock, trace the CD and center circle on card stock. Cut out and color with markers. Using glue stick, attach firmly to the CD.
- 2.With your hot glue gun, carefully attach the open valve top over the center hole of the CD. If it has a cover, cut it off. If it is a pull open/push shut type, make sure it's open.
- 3.Two options to attach the balloon:
 - a) Blow up the balloon (not all the way!) and twist closed, leaving a long tail. Pull the tail over the valve to cover it entirely. Untwist and watch the CD hover!
 - b) Pull the balloon over the valve before blowing it up. From the underside of the hovercraft, blow the balloon up. Hold it tightly between your fingers, set it balloon-side-up on the table, and release to watch it hover!
