PARACHUTE GUY CRAFT

MATERIALS:

- 1 Coffee Filter
- 2 Pipe Cleaners

Optional:

- Washable Markers
- Water in spray bottle or pipette

INSTRUCTIONS:

1. Using one pipe cleaner, create your "guy". Fold gently in half, leaving a loop at the top as the head. Bend the ends of the pipe cleaner into two small loops on either side to create arms, and twist together to create the body. The ends left are the legs!
 2. Thread the second pipe cleaner through the arms of your guy, then attach to the coffee filter. Just push the pipe cleaner through the coffee filter, and fold it over to hold in place. That's it!
- Optional: Before making your parachute, color it with markers and spray with water until damp. Allow to dry before attaching to your guy!
